

PROFESSIONAL PROFILE

A highly motivated and detail-oriented Trainee Goldsmith and Jewellery Manufacturer with extensive hands-on experience in bench fabrication, precision stone setting, and fine watch maintenance [1, 2, 3]. Equipped with formal credentials in fundamental manufacturing, demonstrating high-quality work in gold, silver, and gemstone assembly [2, 3]. Proven track record of executing delicate luxury repairs, custom metalworking, and production-line beading for premier boutique lines [1, 2, 3]. Dedicated to high standards of workshop safety, technical accuracy, and maintaining the prestige of fine luxury brands under master goldsmith mentorship.

TECHNICAL SKILLS & WORKSHOP COMPETENCIES

Bench Fabrication & Metalworking

Precision hand-sawing, piercing, annealing, soldering, and seamless joining of silver and gold. Expertise in metal wire twisting, jump ring fabrication, and link assembly [2, 3].

Stone Setting Expertise

Advanced tube setting (sapphires) on 9ct yellow gold cuffs [2, 3]. Bezel/cabochon stone setting for pendants and rings. Proven skill in multi-stone claw and prong tightening [3].

Plating & Surface Finishing

Professional gold plating on sterling silver. Hand-hammered metal texturing and advanced finishing routines to achieve high-polish, light-reflecting textures [2, 3].

Jewellery Repair & Restoration

High-precision ring resizing (including pavé-set halo diamond bands) [3]. Replacement of missing gemstones, claw rebuilding, and heavy tarnish cleaning of vintage brass, silver, and gold [3].

Luxury Watch Maintenance

Technical servicing for elite luxury and standard watch brands. Specialised in delicate battery replacements and link/strap adjustments [3].

Gemstone Assembly & Beading

Experienced hand-stringing and bead-stringing of gemstone chips (carnelian, mixed gem chips) for delicate gold and silver bracelets and necklaces [1, 2].

EDUCATION & PROFESSIONAL CREDENTIALS

Jewellery Manufacturing Level 1 — Novus Jewellery Training

Waverley, Pretoria

5-Day Beginner Short Course | Completed: 09 September 2022

- **Core Bench Competencies:** Acquired foundational knowledge in ring sizing, metal sawing, intricate piercing, annealing, soldering, jump ring fabrication, and link assembly [2].
- **Material Handling & Workshop Safety:** Developed hands-on experience working directly with sterling silver, gold plating, and safety protocols for proper tool and workshop equipment usage [2].
- **Stone Setting Foundations:** Learned the fundamentals of setting Cabochon gemstones into custom bezel frames and tube-setting faceted gemstones [2].

PROFESSIONAL EXPERIENCE

Trainee Goldsmith — Mervis Bros Jewellers

Eastgate Shopping Centre

- **Technical Watch Servicing:** Entrusted with delicate battery replacements and custom strap/link adjustments for high-end luxury timepieces, including **Rolex, Seiko, Herbelin, Tag (Tag Heuer), Tudor, Tissot, and Casio** [3].
- **Jewellery Repairs & Resizing:** Conducted seamless ring resizing on standard bands and high-value yellow gold rings with intricate pavé-set halo diamond surrounds [3].
- **Gemstone Replacement & Prong Rebuilding:** Tightened worn claws/prongs and replaced missing gemstones on multi-stone rings to secure and restore precious stones [3].
- **Antique & Vintage Metal Restoration:** Repaired and deep-cleaned heavily tarnished vintage brass, silver, and gold jewellery (such as complex brass elephant panel bracelets) back to original lustre [3].
- **Special Edition Fabrication:** Hand-fabricated a custom 9ct Yellow Gold Heart Pendant with a silver gold-plated chain for the signature **Mervis Valentine's Giveaway Competition** (valued at R4,900) [3].

Jewellery Assembler & Beader — Lorne Jewellery

Cape Town

- **Gemstone Bead Assembly:** Exclusively responsible for the hand-beading and gemstone assembly of all necklaces and bracelets, using delicate carnelian and mixed gemstone chips [1, 2].
- **Precious Metals Finishing:** Assembled, polished, and finished jewellery elements fabricated in 9ct yellow gold, sterling silver, and gold-plated silver [1, 2].
- **Boutique Line Assembly:** Fabricated and beaded signature boutique pieces, including a **9ct Yellow Gold Leo star sign pendant** set with a Peridot (August birthstone) [2].
- **Coin Framing:** Built and finished custom Sterling Silver **Coin Frame Pendants** (finished in high-polish gold plating) housing commemorative South African coins [2].
- **Quality Assurance:** Ensured rigorous quality control across all hand-beaded and assembled products to maintain the strict signature design standards of Lorne's local jewellery collections [1].

TECHNICAL WORKS PORTFOLIO (SELECTED PROJECTS)

Project & Piece	Materials Used	Manufacturing Techniques Applied
9ct Gold Sapphire Cuff	9ct Yellow Gold, Sapphires	Hand-fabricated solid gold cuff; crafted custom metal tubes; precision tube-setting of faceted sapphires; high-polish finish [2, 3].
